

GREEN BOND ALLOCATION & IMPACT REPORTING

September 2026

Veolia's Performance in Environmental Security

2 out of 3 of our GreenUp Objectives Already Achieved

GreenUp Strategy Environmental Impact

Decarbonization

+23.6% CO₂e erased (Scope 4)⁽¹⁾ vs 2023
+30% in 2027 vs 2023 & Net Zero 2050

Regeneration

1.57bn m³ of fresh water saved in 2025
1.5bn m³ of fresh water saved in 2027

Depollution

9.2 Mt of hazardous waste & pollutants treated in 2025
9 Mt of hazardous waste & pollutants treated in 2027

Multifaceted Performance a Compass for Value Creation

(1) Calculation Methodology can be found in chapter 4.1.5.4 of our [Universal Registration Document](#)

All Multi-Faceted Performance KPIs on Track or Already Achieved as of December 2025

Environmental

- ✓ **1,574 bn m³** of fresh water saved
- ✓ **18.6% Scopes 1 & 2 GHG emissions reduction** (vs 2021)
- ✓ **€141m decarbonization capex⁽¹⁾**
- ✓ **80% deployment of biodiversity action plans on sensitive sites**

Human Resources

- ✓ **88% Engagement rate**
- ✓ **37.1% of Group Management Committee made up of women**
- ✓ **4.11 Lost Time Injury Frequency Rate** (17% improvement vs 2023)

Commercial

- ✓ **+8% revenue growth of boosters**, including Tuck-ins⁽²⁾
- ✓ **+23.6% vs 2023 of CO₂e erased** (scope 4)⁽³⁾
- ✓ **57 NPS results** (turnover coverage 84%)

Social

- ✓ **9.2M inhabitants benefiting from inclusive access to essential services**
- ✓ **88% positive answers to the “ethics and compliance” question in Veolia Engagement survey**

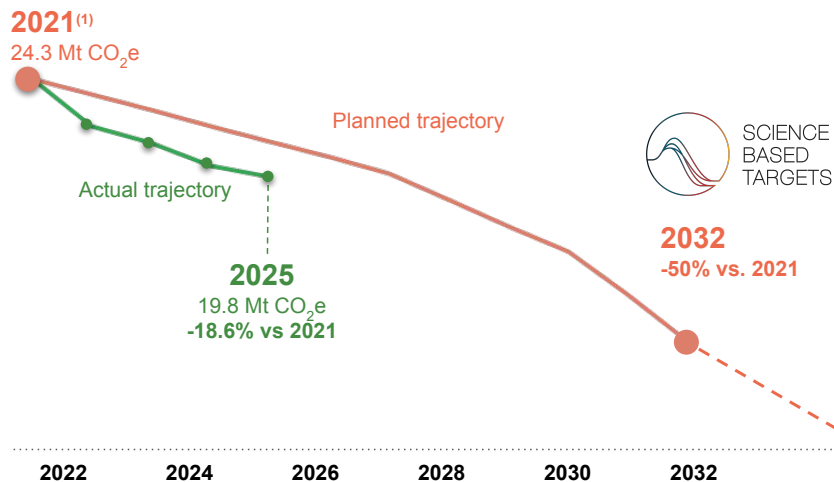

⁽¹⁾ Coal exit and methane capture

⁽²⁾ Excl. energy prices

⁽³⁾ Calculation Methodology can be found in chapter 4.1.5.4 of our Universal Registration Document

Scopes 1&2: Veolia Carries on Massive **Decarbonization** Plans

Ahead of our decarbonization trajectory

Main decarbonization levers

- **Methane capture plan** especially in Latin America
- **Energy efficiency plan** over Veolia assets
- **Conversion of coal-fired combined heat & power plants**

-18.6% CO₂ already achieved for scopes 1&2 vs 2021

ESG Ratings Validating Veolia's Leadership in 2025

General ESG

> ESG rating of A in 2025

> ESG Risk Rating of 19.9, Low risk⁽⁴⁾

> Sustainability Yearbook 2025 (Top 5%)⁽²⁾
> Dow Jones Best-In-Class World and Europe
> 5th in the Multi and Water Utilities industry

> Prime status and 1st decile (B rating)
in the Multi-Utilities industry⁽³⁾

> Top 1% of Water Utilities⁽¹⁾

Climate

> Climate change: A rating,
Leadership band⁽⁵⁾

> Net Zero 2050 validation⁽⁶⁾
> Certified 1.5°C

> NZ-2 rating "Advanced"⁽⁷⁾
> Certified 1.5°C

Water

> Water security: A rating,
Leadership band⁽⁵⁾

⁽¹⁾ at 29/07/2025 in the Water collection treatment and supply industry ⁽²⁾ In 2025 ⁽³⁾ at 22/09/2025 ⁽⁴⁾ as at 21/03/2026 ⁽⁵⁾ CDP 2025

⁽⁶⁾ based on the Net Zero Assessment released on July 20, 2025 ⁽⁷⁾ based on the Net Zero Assessment released on July 12, 2024

Main Extra Financial Achievements in 2025

Extra-Financial Ratings

Recognition of our leadership in climate and water management

The highest "A" rating from CDP in 2025 on both "Climate change" and "Water security" themes in 2025

Governance

Ecological transformation acceleration with the "Future Generations Council"

An open dialogue with 30 young people under 30 from around the world to propose concrete actions reviewed in the ExCo

Employee Engagement

Reinforcing employee shareholders

Major success with the 16th Sequoia plan, launched in 2025, reaching 9.35% employee shareholding rate

Protecting Biodiversity in our Operations

Engaging with our Stakeholders

- Commitment since 2018, increased in 2024
- 14 commitments aligned with COP15 global framework
- Disclosure of impact and dependencies of the value chain in line with TNFD⁽¹⁾ framework

Protecting Biodiversity on Operational Sites

- Zero-pesticide policy
- Ecological management on sites > 1 hectare of green space
- > 150+ most sensitive sites: dedicated action plans following a biodiversity footprint assessment

Progress rate of biodiversity action plans: 80 % in 2025

Target for 2027 is to reach 85%+ for biodiversity action plans

Veolia's Alignment Ratio with the EU Green Taxonomy

Alignment Continues to Improve in 2025

- Aligned turnover of 46% in 2025 vs 44% in 2024
- 73% of eligible scope is aligned in 2025 vs 71% in 2024

A confirmation of:

- The growing part of green activities in the portfolio and new projects
- The worldwide environmental performance of activities, illustrated by the high compliance ratio of eligible activities with the EU taxonomy demanding screening criteria

All 3 activities contribute significantly to the aligned Capex:

37% Water

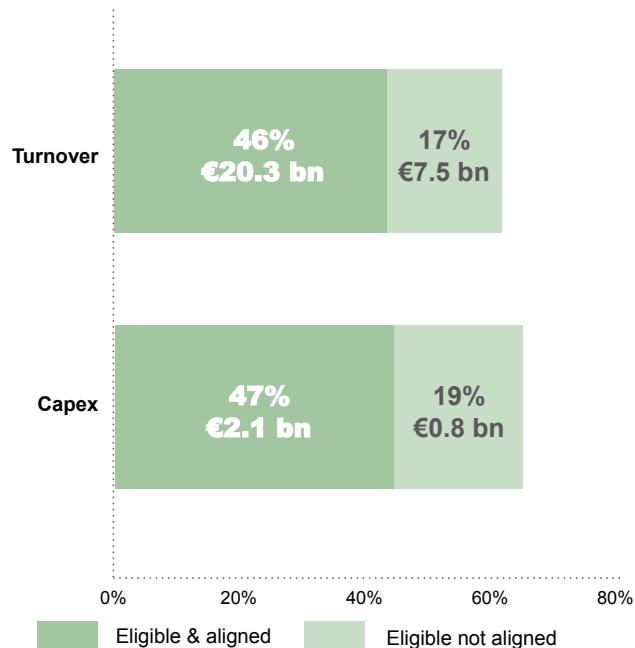

34% Waste

29% Energy

Alignment rate with EU Green Taxonomy in 2025

Veolia's Green Financing Framework at a glance

A state-of-the-art Green Financing Framework supporting our ambitious sustainable investments program (1)

Use of Proceeds

- Eligible expenditures include **CapEx** and **Equity Investments** into “pure player” entities
- Financing and refinancing with a **2-year look-back / look-forward** period
- Veolia’s **Eligibility Criteria** for projects :
 - All projects contribute to at least one EU environmental objective
 - All projects satisfy the EU Taxonomy’s Substantial Contribution Criteria
 - All projects are aligned with the EU Taxonomy’s Minimum Safeguards
- High-level **Eligible Green Project Categories**:
 - Energy
 - Water
 - Waste
- Respect the Paris Aligned Benchmark exclusion criteria

Guidelines for Blue Finance from the IFC and Bonds to Finance the Sustainable Blue Economy (SBE) – A Practitioner’s Guide published by ICMA

Management of proceeds

- Management of proceeds via a **portfolio approach** and a **proprietary EU Taxonomy database** serving as a Green Asset Register
- Replacement of no longer eligible projects within 24 months
- Any unallocated proceeds will be held in accordance with Veolia’s treasury management policies

A state-of-the-art Green Financing Framework supporting our ambitious sustainable investments program (2)

Process for Project Evaluation and Selection

- **ESG Committee** defines Veolia's strategic priorities and approves its environmental policy, objectives and management system
 - co-chaired by the Group General Counsel, the Senior Executive Vice President for Strategy and Innovation and the Senior Executive Vice President for Human Resources
- Focus on **environmental and social risks and mitigants** through:
 - Annual publication of Vigilance Plan
 - Ensuring applicable national and international environmental and social standards and regulations are met
 - Group alert procedure
 - An Environmental & Industrial Management System (EIMS)

Reporting & External Review

- **Annual Allocation and Impact Reporting** starting 1-year after issuance, until full allocation and in the event of material changes
- Veolia will report on the **total amount allocated to projects** that are **aligned to the EU's Technical Screening Criteria** and **those only aligned to the Substantial Contribution Criteria**
- Second Party Opinion from **Moody's (SQS2)**
- Annual reporting subject to an **external auditor's assurance report**

Second Party Opinion from Moody's

Moody's have assigned an SQS2 Sustainability Quality Score (Very Good) to Veolia's Green Financing Framework

Sustainability Quality Score

- The framework demonstrates a **significant contribution to sustainability**.

Alignment with Principles

- Framework is aligned with the four core components of the:
 - ICMA Green Bond Principles (GBP) 2021 (including the June 2022 Appendix 1) and
 - LMA/APLMA/LSTA Green Loan Principles (GLP) 2023

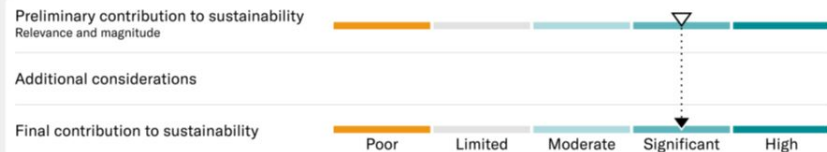

Overall alignment

FACTORS	ALIGNMENT
Use of proceeds	
Evaluation and selection	
Management of proceeds	
Reporting	

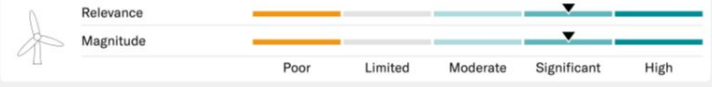

Contribution to Sustainability

- The framework demonstrates a significant overall contribution to sustainability. This reflects a preliminary contribution to sustainability score of **significant**, based on the relevance and magnitude of the eligible project category, and we have not made an adjustment to the preliminary score based on additional contribution to sustainability considerations

Preliminary Contribution to Sustainability

• Energy

• Water

• Waste

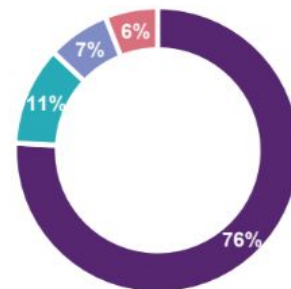

May 2025 Green Hybrid Bond Allocation & Impact

External Report (extract of the 2025 Universal Registration Document) regarding EU taxonomy alignment

Compliance with the reporting requirements set out in Article 8 of Regulation (EU) 2020/852

Nature of procedures carried out

Our procedures consisted in verifying the process implemented by Veolia Environnement to determine the eligible and aligned nature of the activities of the entities included in the consolidation.

They also involved verifying the information reported pursuant to Article 8 of Regulation (EU) 2020/852, which involved checking:

- compliance with the rules applicable to the presentation of this information to ensure that it is readable and understandable;
- based on a selection, the absence of material errors, omissions or inconsistencies in the information provided, i.e. information likely to influence the judgement or decisions of users of this information.

Conclusion of the verifications carried out

On the basis of the procedures we have carried out, we have not identified any material errors, omissions or inconsistencies relating to compliance with the requirements of Article 8 of Regulation (EU) 2020/852.

Emphasis of matter

Without qualifying the above conclusion, we draw your attention to the paragraph "Methods applied to calculate the Key Performance Indicators" of Section 4.1.2.6.3, "Methodology" of the Sustainability Statement, describing the analysis conducted during the year of Taxonomy OpEx.

Elements that received particular attention

Regarding key performance indicators and related information

The key performance indicators and related information are presented in section 4.1.2.6, "European Union Green Taxonomy" of the Sustainability Statement.

As part of our procedures, we notably conducted interviews with the persons concerned and consulted, on a sample basis, the documentary sources used.

For the revenue and CapEx totals (the denominators) presented in the regulatory tables, we examined the reconciliations performed by the entity with group consolidated accounts.

For the other amounts making up the various indicators for eligible and/or aligned activities (the numerators), we performed analytical procedures and assessed these amounts based on a selection of activities and transactions determined by reference to the underlying activity, their contribution to the indicators, or a risk analysis.

Finally, we assessed the consistency of the information disclosed in Section 4.1.2.6, "European Union Green Taxonomy" of the Sustainability Statement with the other sustainability-related information in the Group management report.
