Veolia Environnement S.A.

Post-issuance Second Party Opinion – Green Bond Allocation and Impact reporting Aligned with Principles

Summary

Within the scope of our work, we have assessed Veolia Environnement S.A.'s green bond issued in May 2025, under Veolia's green financing framework published in March 2025.

We assess that Veolia has allocated proceeds from this issuance in alignment with the four core components of the International Capital Market Association's (ICMA) Green Bond Principles (GBP) 2025 and in accordance with the framework-level criteria. Net proceeds from the issuance have been allocated to three eligible categories of the framework, namely energy, water and waste.

The issuance meets the same alignment components as in the pre-issuance [Second Party Opinion](#) (SPO) that we published on 27 March 2025. In addition, through this post-issuance review, the issuer has achieved an additional best practice, namely an independent external review of the reported benefits, as detailed in Appendix 1.

Scope

We have provided a post-issuance SPO to assess on whether the proceeds from Veolia's green bond issued in May 2025 were allocated in alignment with the ICMA's GBP 2025, and whether the issuance was in line with the issuer's commitments in its green financing framework dated March 2025.

Our assessment is based on Veolia's green bond allocation and impact report covering the May 2025 issuance, with the latest version received on 11 September 2026, and its green financing framework dated March 2025. Our opinion reflects our point-in-time assessment¹ of the details contained in these documents, and other public and non-public information provided by the issuer.

Our work does not constitute an assurance, verification or audit.

We produced this post-issuance SPO review based on our [Assessment Framework: Second Party Opinions on Sustainable Debt](#), published in October 2025.

Issuer profile

Veolia Environnement S.A., headquartered in France, is one of the largest global providers of environmental services, operating in the water, waste and energy sectors. The company supplies drinking water to 113 million people and wastewater treatment services to 103 million people. It also provides waste management and energy services worldwide. In 2023, Veolia employed nearly 218,000 people and reported revenue of €45.4 billion. Veolia is a publicly traded company with a diverse ownership structure, including institutional and individual shareholders. Veolia's 2024-2027 Strategic Programme focuses on affordable solutions for depollution, decarbonisation and resource regeneration, emphasising sustainable development and employee engagement.

Key highlights

- » Veolia has allocated the net proceeds from its issuances in alignment with the ICMA's GBP 2025.
- » The proceeds have been allocated to projects referring to the economic activities of the EU Taxonomy.
- » The proceeds were fully allocated at the time of issuance.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

We assess that the green bond issued in May 2025 under Veolia's green financing framework dated March 2025 is aligned with the four core components of the ICMA's GBP 2025. Compared with the pre-issuance SPO, the issuer has achieved an additional best practice, namely an independent external review on the impact reporting, as part of this post-issuance assessment. A detailed assessment by factor for alignment with principles is provided below.

Use of proceeds

The net proceeds from the 2025 issuance have been fully allocated to eligible expenditures across three eligible categories, in line with the eligibility criteria defined under Veolia's green financing framework of 2025. As of May 2025, all the net proceeds from the issuance, equivalent to an amount of €500 million, were allocated to the eligible categories of energy, water and waste (see Exhibit 1). All the net proceeds have been allocated to the projects complying with the eligibility criteria for all the categories in the framework. Most of the proceeds were allocated to the economic activities of the EU Taxonomy: CCM 5.1 - Construction, extension and operation of water collection, treatment and supply systems; and PPC 2.2 - Treatment of hazardous waste. Additionally, the eligible projects financed have clear, relevant and coherent environmental objectives, with benefits that are measurable, in line with our pre-issuance assessment expectations.

The financed projects were located across all regions where Veolia operates, in line with its pre-issuance commitment. Most of the proceeds were allocated to projects located in Central and Eastern Europe, France and North America (See Exhibit 2).

The company has confirmed that all the proceeds were used for refinancing and that this information was disclosed at the time of issuance.

Process for project evaluation and selection

Veolia's decision-making process for the evaluation and selection of projects is clearly structured, as outlined in its publicly available 2025 framework. The issuer has confirmed that no changes have been made to this process and that it was adhered to for the issuance. Veolia has established an ESG Committee, comprising functional departments responsible for environmental, social, societal, compliance and governance matters, ensuring effective coordination among these areas. The committee is responsible for selecting eligible projects in line with the eligibility criteria, monitoring these projects and replacing those projects that no longer comply with the established criteria.

Veolia maintains a comprehensive approach to environmental and social risk management throughout its evaluation and selection process, incorporating monitoring controversies, and identifying and managing environmental and social risks. All projects continue to follow Veolia's environmental and social risk management process, which is defined and publicly disclosed at the company level.

Management of proceeds

Veolia has confirmed that all elements of its process for the management and allocation of proceeds remain the same, as detailed in its framework. As all proceeds were allocated directly to eligible categories, Veolia has complied with its commitment to allocate the bond proceeds within 24 months. There were no temporarily unallocated proceeds.

Reporting

Veolia's reporting is in line with its initial commitments on the frequency of post-issuance reporting, and the issuer has confirmed its commitment to reporting until the full allocation of proceeds and in case of material changes, but does not commit to report on the impacts until the maturity of the bond. The allocation and impact report for the 2025 allocation is publicly available on the issuer's website.

Veolia's allocation and impact reports exhaustively cover all required and recommended information. These reports specify the EU Taxonomy economic activities to which proceeds have been allocated within each eligible category and present the associated aggregated impact results.

The eligible categories include clear and relevant impact indicators aligned with Veolia's March 2025 green financing framework, enabling the measurement of the projects' sustainable benefits (see exhibit 3). The methodologies and assumptions used to calculate the impact indicators are clear and disclosed.

Veolia has fulfilled its commitment to obtain an independent external review of fund tracking and allocation through a post-issuance review, as part of this assessment. The external review of the impact reporting represents a shift in the initial pre-issuance framework-level commitments and aligns with market best practices.

Exhibit 3

Veolia's impact reporting aligns with commitments in its pre-issuance framework
Review of 2025 green bond issuance reporting by eligible category

Eligible Category	Sub-categories	Impact reporting metric	Reported impact 2025	Comment
Energy	CCM 4.9 Transmission and distribution of electricity	Newly enabled generation capacity in the system Average system grid emissions factor GHG emissions avoided/reduced	172 kt CO2e Erased Emissions (scope 4)	
	CCM 4.20 Cogeneration of heat/cool and power from bioenergy	Energy generated (thermal and electrical) Share of renewable and recovered Greenhouse gas emission savings from the use of biomass	1,01 million MWh produced from bioenergy / year	
Water	CCM 5.1 Construction, extension and operation of water collection, treatment and supply systems	Amount of drinking water produced and distributed Energy efficiency of drinking water production (excluding seawater desalination) (pro forma 2019-2023) Net average energy consumption for abstraction and treatment	1,984 millions cubic meters of water supplied	The issuer has reported on selected key impact indicators, generated by the projects. The issuer has used recognized metrics enables comparability.
	CCM 5.3 Construction, extension and operation of wastewater collection and treatment	Energy efficiency of wastewater treatment: Net energy consumption of the wastewater treatment plant Volume of water reused from collected and treated wastewater Wastewater treatment sludge recovery rate	363 millions cubic meters of wastewater treated	
Waste	PPC 2.2 Treatment of hazardous waste	Material recovery rate of secondary raw materials (including chemical substances and critical raw materials) meant to substitute primary raw materials or chemicals in production processes	Capacity of 373 kTons of Hazardous Waste treated / year	
	CCM 5.8 Composting of separately collected bio-waste	Volume of treated waste Volume of plastics recycled in Veolia's processing plants	114 kTons of Bio-Waste composted in 2025 Capacity of 13 kTons of PET recycling	
	CCM 5.9 Material recovery from nonhazardous waste	Material recovery rate from treated waste Amount of waste composted

Endnotes

[1](#) Point-in-time assessment is applicable only on the date of assignment or update.

Moody's assigns SPOs in alignment with the main tenets of the ICMA Guidelines for Green, Social, Sustainability and Sustainability-Linked Bonds External Reviews and the LSTA/LMA/APLMA Guidance for Green, Social and Sustainability-Linked Loans External Reviews, as applicable; Moody's practices may however diverge in some respects from the practices recommended in those documents. Moody's approach to assigning SPOs is described in its Assessment Framework, and is subject to the ethical and professional principles set forth in the Moody's Investors Service Code of Professional Conduct.

Additional terms with respect to Second Party Opinions (as defined in Moody's Investors Service Rating Symbols and Definitions): Please note that a Second Party Opinion ("SPO") is not a "credit rating". The issuance of SPOs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
