MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

Estelle Brachlianoff, Chief Executive Officer of the Group, commented:

"*Veolia delivered strong growth in the third quarter, with revenue up +5.0%[1], driven notably by the performance of our international activities and Water. This momentum reflects the strength of our positioning, offering unique solutions to address critical needs. Current context confirms that Veolia relies on powerful structural trends, including water security, resource sovereignty, and the growing demand for essential environmental services.*

We continued to improve our operational performance, with a further 50-basis-point increase in EBITDA margin. This achievement demonstrates the benefits of our recurring efficiency plans, the strict discipline of our operational management and our ability to implement additional action plans whenever required.

The transformation of our portfolio towards international and innovative activities, with higher value creation, is progressing rapidly. The integration of Clean Earth has got off to a successful start, strengthening our platform in the United States, while our disposal plan is well underway, with €570 million of disposals already signed at an average multiple of 10.4 times EBITDA.

Building on these solid results we fully confirm our 2026 guidance and our GreenUp trajectory."

[1] *At constant scope and exchange rates and excluding energy prices*

1

MAJOR EVENTS OF THE PERIOD

1 Major events of the period

1.1 BUSINESS AND INCOME TRENDS

VERY SOLID PERFORMANCE AS OF THE END OF SEPTEMBER 2026 AND CONFIRMED 2026 OUTLOOK

The Group confirms the strength of its financial performance, driven by rigorous operational execution, effective balance sheet management and stronger revenue growth in the third quarter, up 5.0%(1), notably supported by the performance of the International and Water businesses. Over the first nine months of the year, revenue increased by 2.6%(1), to reach €33,310 million, while EBITDA rose by 5.1%(2) to €5,404 million.

This momentum is underpinned by resilient growth of all activities, as well as Veolia's unique positioning and its ability to address growing needs in water, waste and energy management. Strict operational discipline, supported by recurring efficiency plans reinforced by targeted additional actions and gains generated by digital technologies and artificial intelligence,helped improve the margin by 50 basis points.

Veolia is also continuing the value-creating transformation of its portfolio towards international markets and technologies, with the successful launch of the integration of Clean Earth in the United States. The divestment plan is also well advanced. Against this backdrop, the 2026 targets and the trajectory of the GreenUp plan are fully confirmed.

			2026 / 2025	
(€ million)	**30 September 2025**	**30 September 2026**	**Δ at constant exchange rates**	**Δ at constant exchange rates & scope**
Revenue	32,323	33,310	3.3 %	2.1 %
EBITDA (1)	5,080	5,404	6.5 %	5.1 %
Current EBIT (1)	2,737	2,950	8.0 %	6.7 %
Net Financial Debt (1)	-19,925	-25,423		

(1) The indicators are defined in Section 5.1 below.

Revenue as of September 30, 2026 stands at €33,310 million and varies by +2.6% at constant scope and exchange rates excluding energy prices (+2.1% at constant scope and exchange rates), of which organic growth in Water (+2.6%), Energy (+3.8%)(1) and Waste (+1.5%). Geographically, the Group benefits from solid international organic growth, which is distributed as follows across the Group's different segments:

- **Americas, Asia Pacific, Africa Middle-East (€9,067 million, +4.7%)(2):** in Water, North America grew by +5.7%(2) and Regulated Chile by +5.8%(2), as well as in the Waste business, which grew by +13.1%(2) in Latin America, +4.4%(2) in Asia Pacific and +2.8%(2) in North America. In the Energy activity, Latin America recorded a growth of +36.4%(2);
- **Europe (€14,253 million, +2.8%(2) and +3.8% excluding energy prices)**: this growth is explained by good performances in the Water activity for Central and Eastern Europe (+12.9%)(2) and for Iberia (+4.7%)(2). The Waste business is holding up in the region, despite commercial selectivity in Germany, thanks to the good performance of Northern Europe (+6.1%)(2). Excluding energy prices, the Energy sector grew by +4.2 % in Central and Eastern Europe and +0.9% in Northern Europe;
- **France and Hazardous Waste Europe (€6,571 million, -0.2%)(2):** Water France grew by +0.9%(2) while the Recycling and Recovery activity declined by -2.6%(2) due to commercial selectivity and construction work despite a positive net price effect;
- **Water Technologies (€3,403 million, -2.5%)(2):** the segment declined despite a good performance from the Products & Technologies and Services activities. Excluding the Projects activity, the segment posted growth of +2.6% at constant scope and exchange rates, with a strong positive third-quarter contribution.

EBITDA as of September 30, 2026 stood at €5,404 million, an increase of +5.1% at constant scope and exchange rates. This increase is driven by business growth and operational performance (+6.0%), favorable climate impact (+0.6%) mitigated by the price effect of energy and recyclables (-1.4%).

Gross operational efficiency gains amount to €294 million.

Current EBIT was €2,950 million, up +6.7% at constant scope and exchange rates compared to September 30, 2025.

Net financial debt stood at €25,423 million as of September 30, 2026, an increase of €5,498 million compared to September 30, 2025, mainly due to significant financial investments made in the first half of 2026, notably the acquisition of Clean Earth on June 1, 2026 for €2,804 million (including mainly €2,542 million of acquisition price and €226 million of IFRS 16 debt), the payment of dividends approved by the Combined General Meeting of April 23, 2026 for an amount of €1,099 million, and the repayment of €500 million of hybrid debt maturing on September 12, 2026.

(1) At constant scope and exchange rates, excluding energy prices.
(2) At constant scope and exchange rates.

1.2 CHANGES IN GROUP STRUCTURE - STRATEGIC PROGRAM

1.2.1 Innovations and commercial developments

In 2026, Veolia continues the deployment of its GreenUp plan. The Group continues to innovate and strengthen its commercial footprint in geographical areas and in strategic businesses for the Group.

- **Major success in waste management in the UK**

As of February 26, 2026, Veolia announced that it had won or renewed 11 contracts with UK local authorities in 2025, for a value exceeding £1 billion. These successes, which include long-term contracts with Bromley Council and several other local authorities, mean the Group now has over 50 public-sector partners in the country. In connection with the GreenUp program, these activities support decarbonization and the circular economy, in particular through the investment of £70 million in a PET recycling facility in Shropshire.

- **Strategic strengthening in the water sector in Mumbai**

Veolia announced the signature of two operating and maintenance contracts (O&M) in February 2026 for 15 years for the future drinking water production plants in Bhandup and Panjrapur in Mumbai. With a total capacity of 2.91 million m3 per day, these projects on an unprecedented scale covering more than 60% of the town's water needs by 2030.

- **Coal Phase-out in Karviná, Czech Republic**

Veolia is transforming the Karviná power plant into a multi-energy facility (biomass, gas, solid recovered fuels) aiming for a complete coal phase-out by 2029. This project will reduce CO_2 emissions by 200,000 tonnes per year while supplying 50,000 households. This major initiative strengthens the "New Urban Energy" momentum to decarbonize district heating networks in Europe by 2030.

- **On April 14, 2026, Veolia launched a next-generation integrated offering to reinvent the future of data centers globally. The Group is accelerating in the data center and semiconductor markets and targets 1 billion euros per year by 2030 by planning:**
  - **Strong growth ambition:** Veolia is accelerating in these critical markets and targets 1 billion euros in annual revenue by 2030;
  - **A response to resource pressure:** Demand is exploding and the combined water consumption of data centers and semiconductor manufacturing is expected to reach the equivalent of that of 46 million people by 2030. Faced with local resistance related to this overconsumption, Veolia positions itself as the partner for environmental security;
  - **Launch of the "Data Center Resource 360" offering:** This new integrated solution, which is part of the GreenUp strategic plan and particularly targets the United States and Europe, aims to turn data centers into "circular hubs". The performance objectives are ambitious: up to 20% energy reuse (notably through waste heat recovery), 75% reduction in water footprint, up to 95% waste recycling and reuse;
  - **Digital technology and AI as efficiency drivers:** Veolia relies on Hubgrade, its digital platform powered by artificial intelligence, to monitor and optimize operations in real time. More broadly, the Group aims to double the share of its operational efficiency gains from AI and digital technology to reach 50% by 2030.
- **Launch on April 23, 2026 of two new unprecedented dialogue forums with stakeholders at the heart of environmental security**

Faced with new threats and growing challenges in environmental security, Veolia announced on April 23, 2026, on the sidelines of its Annual General Meeting, the creation of two dialogue and co-construction forums. The Stakeholder Assembly, an unprecedented working group, brings together 34 international figures - clients, financial partners, environmental organizations, employees and civil society representatives - to reflect, initially, on water security and the promises currently offered by water reuse.

The Future Generations Council, made up of 30 international stakeholders under thirty years of age, will meet twice a year with Estelle Brachlianoff, Chief Executive Officer of Veolia, and with the Executive Committee.

- **On April 27, 2026, Veolia announces its collaboration with Amazon to deploy wastewater reuse for data center cooling**

This collaboration combines Veolia's advanced treated wastewater reuse technologies, as a global leader in water technologies, with Amazon's artificial intelligence and cloud capabilities, in order to develop more sustainable strategies for data centers.

It supports Amazon's goal of achieving a water positive footprint in its direct data center operations by 2030 and aligns with the objectives of Veolia's GreenUp strategic program in terms of resource preservation, pollution control and decarbonization.

This project is part of Veolia's new "Data Center Resource 360" offering, designed to optimize resource management for next-generation data centers.

- **On June 5, 2026, Veolia's Stakeholder Assembly calls for accelerated treated wastewater reuse to enhance water security**

As water resources become increasingly scarce, Veolia, a global leader in Water Technologies, has announced the release of a white paper aimed at unlocking the economic and strategic potential of treated wastewater reuse. Thirty-four international stakeholders – economists, industry players, insurers, and public officials from around the world, who are committed to working with the Group – propose concrete actions to accelerate the implementation of innovative solutions that address urgent and critical needs.

- **Veolia strengthens its leadership in Latin America with a major water contract signed on July 30, 2026 in Colombia to modernize Cúcuta's water infrastructure**

On July 30, Veolia announced the launch of a project to modernize drinking water and sanitation infrastructure (reducing water losses from 42% to less than 30%), strengthen the resilience of essential services, and enhance environmental security more broadly for Cúcuta's 866,000 inhabitants. This contract represents an average annual revenue of approximately €100 million over 20 years.

- **In Saudi Arabia, Veolia signs three strategic agreements to accelerate the environmental security of the Kingdom**

In September 2026, Veolia announced the signing of three memoranda of understanding with three of the Kingdom's major players in industrial development (Acwa, Ma'aden and Khazeen). They form part of the key objectives of Saudi Vision 2030 in terms of preservation of resources, acceleration of the circular economy, and decarbonization.

- **On September 30, 2026, Veolia won a major €1-billion drinking water services contract in Spain spanning 25 years**

Veolia announced that the Metropolitan Council of Barcelona has awarded it the historic contract worth €1 billion over 25 years to manage essential drinking water services in eight municipalities in the Barcelona Metropolitan Area (Área Metropolitana de Barcelona – AMB), representing about 230,000 inhabitants. This contract will consolidate the Group's long-standing presence and commitment in Spain, which is set to become its third market worldwide in the coming years.

- **In the United Kingdom, Veolia wins waste management contracts worth £0.7 billion**

In July, Veolia secured a ten-year contract with the East London Waste Authority worth approximately £183 million, with Veolia providing recycling and waste management services for 1.2 million residents. Veolia is now a partner of more than half of London's local authorities, delivering social value services, recycling, and waste treatment to over 5 million Londoners.

In September, Veolia won a £527 million waste management contract for Surrey Councils to provide essential services to more than 420,000 residents. Innovations in artificial intelligence and enhanced data analysis will be implemented to help increase recycling rates.

1.2.2 Changes in Group structure

The main change in scope as of September 30, 2026 was as follows:

- **Acquisition of a Hazardous Waste Treatment business in Australia**

In early 2026, the Group signed an agreement to acquire Enviropacific Services, an Australian Hazardous Waste Treatment company specializing in soil decontamination and contaminated water treatment. This transaction was finalized during the first quarter of 2026 for AU$228 million (€137 million).

This acquisition follows the usual pattern of targeted acquisitions ("tuck-ins") and strengthens Veolia's pioneering position in the fight against PFAS contamination in Australia. This strategic operation contributes to the Group's ambition to achieve €1 billion in revenue from the treatment of PFAS and micropollutants by 2030.

- **Acquisition of Clean Earth in the United States**

On November 20, 2025, the Group signed an agreement with Enviri to acquire Clean Earth, a leading player in the hazardous waste sector in the United States.

This transaction was finalized on June 1, 2026 for US$2,989 million (€2,542 million).

This deal doubles Veolia's presence in the hazardous waste sector in the United States, bringing its revenue in the country to US$6.3 billion[(1)].

Already the world's leading provider of hazardous waste management services and technologies, the Group is now the second-largest player in the United States, marking the start of a new phase of growth for the Company in the country.

- **Sale of minority interests in the United Kingdom**

On September 25, 2026, the Group closed the sale of 20% of the shares held in Rookery South Limited (equity-accounted), which operates an energy recovery plant north of London. The transaction amounted to £87 million (€101 million).

This sale is part of the asset rotation plan for this year.

1.3 GROUP FINANCING

1.3.1 Group debt structure

Net financial debt is €25,423 million as of September 30, 2026.

Cash stands at €9,104 million as of September 30, 2026, after the repayment on February 9, 2026 of €850 million of deeply subordinated securities, the repayment on June 9, 2026 of €750 million for a bond reaching maturity, and the repayment on September 12, 2026 of €500 million of deeply subordinated securities.

The Group also has at its disposal a multi-currency syndicated loan, with a total undrawn amount of €4,500 million as of September 30, 2026, as well as bilateral credit facilities with a total undrawn amount of €1,289 million as of September 30, 2026.

This enables it to benefit from a solid net liquidity position of €4,087 million as of September 30, 2026, after taking into account current debts (including bank overdrafts and other cash position items) in the amount of €10,805 million.

1.3.2 Bond debt management

On January 14, 2026, Veolia carried out a bond issue for a total amount of 2.5 billion euros in three tranches, respectively of €950 million at a rate of 3.209% maturing in January 2031, €900 million at a rate of 3.639% maturing in January 2034, and €650 million at a rate of 4.052% maturing in January 2038, respectively. The weighted average rate is 3.583%.

On April 10, 2026, Veolia proceeded with a second bond issuance in 2026 for an amount of €1 billion in two tranches: €500 million at a rate of 3.69% maturing in April 2031 and €500 million at a rate of 4.122% maturing in April 2036.

On June 19, 2026, Veolia also Veolia also carried out a €275 million tap offering on the bond line issued on April 10, 2026 that was for amount of €500 million and was set to mature in April 2036.

On June 29, Veolia issued €400 million in non-dilutive convertible bonds, redeemable solely in cash, with an annual coupon of 0.75% and a redemption date of January 2, 2032 at par value.

On August 26, 2026, Veolia proceeded with a new bond issuance for an amount of €1.15 billion in two senior tranches: €650 million at a rate of 3.678% maturing in September 2030 and €500 million at a rate of 4.088% maturing in September 2034.

1.3.3 Confirmation of the credit outlook

On April 27, 2026, Standard and Poor's confirmed Veolia Environnement's credit rating at A-2/BBB with a stable outlook. On May 4, 2026, Moody's confirmed the Group's rating at P-2/Baa1 with a stable outlook.

1.3.4 Dividend payment

The combined general meeting of shareholders on April 23, 2026 approved the payment of a dividend of €1.50 per share for the 2025 financial year, payable in cash. The 2025 dividend was paid on May 13, 2026 for an amount of €1,099 million.

(1) Proforma Veolia US incl. Water Technologies + Clean Earth Full Year 2025.

1.4 FREE SHARE AND PERFORMANCE SHARE PLANS AND GROUP SAVINGS

In addition to the long-term incentive plans outlined in the chapter 2 of the 2025 Universal Registration Document (URD) amendment , the Company has continued its policy of involving its employees in the company's development and value creation by launching a new employee share ownership program. On June 9, 2026, the Group announced the launch of an employee shareholding scheme open to around 180,000 Group employees.

The subscription rate was above 48%, the highest ever recorded at Veolia, with more than 88,000 employees choosing to subscribe. As a result of the transaction, Group employees further increased their position as Veolia's largest shareholder by holding more than 9.8% of the Company's share capital.

To neutralize the dilutive effect of the transaction, Veolia proceeded with a concurrent capital reduction through cancellation of treasury shares acquired under the share buy-back program. The total share capital therefore remains unchanged after these transactions.

Through this new transaction, Group employees have strengthened their position as Veolia's largest shareholder. This success again reflects the commitment of Group employees to the objectives set out in the GreenUp 24-27 strategic plan.

1.5 CHANGES IN GOVERNANCE

As part of the annual re-election of the Board, the Board of Directors' meeting of November 5, 2025 noted the expiration of the terms of office of three directors at the end of the General Meeting of April 23, 2026 (Mr. Antoine Frérot, Mrs. Estelle Brachlianoff and Mrs. Agata Mazurek-Bąk) and that Mrs. Agata Mazurek-Bąk as well as her replacement Mr. Romain Ascione did not seek the renewal of her term of office at the end of that General Meeting.

At the recommendation of the Nominations Committee, the Board of Directors decided to recommend the renewal by the Combined General Meeting of April 23, 2026 of the terms of office as director of Mr. Antoine Frérot and Mrs. Estelle Brachlianoff, and the appointment of Mr. Jean-Christophe Taret as director representing employee shareholders, and of Mrs. Sandra Cortese as a replacement, to replace Mrs. Agata Mazurek-Bąk and Mr. Romain Ascione respectively.

The Veolia Environnement Combined General Meeting of April 23, 2026:

- renewed the terms of office of Mr. Antoine Frérot and Ms. Estelle Brachlianoff as directors; and
- the appointment of Mr. Jean-Christophe Taret as director representing employee shareholders and Mrs. Sandra Cortese as a replacement;

for a four-year period expiring at the end of the 2030 Ordinary General Meeting called to approve the financial statements for the year ending December 31, 2029.

The Board of Directors, following the recommendation of its Nominations Committee, renewed the mandate of Mr. Antoine Frérot as Chairman of the Board of Directors, it being specified that in 2028, he will reach the age limit set by the bylaws for chairing the Board of Directors. In 2026 and 2027, a review will be conducted by the Nominations Committee and by the Board of Directors regarding the succession of the Chairman of the Board of Directors. In addition, the Board of Directors confirmed Mrs. Estelle Brachlianoff as Chief Executive Officer.

At the date of this document, the Veolia Environnement Board of Directors had fifteen directors, 75% of whom were independent directors (excluding the two directors representing employees and the director representing employee shareholders) and 46%[1] of whom were women, and one non-voting member (censeur):

- Mr. Antoine Frérot, Chairman of the Board of Directors;
- Mrs. Estelle Brachlianoff, Chief Executive Officer;
- Mr. Pierre-André de Chalendar*, Senior Independent Director;
- Mr. Olivier Andriès*;
- Mrs. Maryse Aulagnon;
- Mrs. Véronique Bédague*;
- Mr. Philippe Brassac*;
- Mr. Arnaud Caudoux*;
- Mrs. Isabelle Courville*;
- Mr. Franck Le Roux, Director representing employees;
- Mrs. Julia Marton-Lefèvre*;
- Mr. Pavel Páša, Director representing employees;
- Mrs. Elena Salgado*;
- Mr. Jean-Christophe Taret, Director representing employee shareholders;
- Mr. Guillaume Texier*.

* *Independent member.*

[1] *Excluding the two Directors representing employees in accordance with Articles L. 225-27-1 and L. 22-10-7 of the French Commercial Code.*

The composition of the Board Committees is:

- **Accounts and Audit Committee:** Mr. Guillaume Texier (Chairman), Mr. Olivier Andriès, M. Philippe Brassac, Mrs. Véronique Bédague, Mr. Arnaud Caudoux, et Mr. Franck Le Roux (Director representing employees);
- **Nominations Committee**: Mr. Pierre-André de Chalendar (Chairman), Mrs. Maryse Aulagnon, Mr. Philippe Brassac, Mrs. Isabelle Courville and Mr. Antoine Frérot;
- **Compensation Committee**: Mr. Olivier Andriès (Chairman), Mrs. Maryse Aulagnon, Mr. Pierre-André de Chalendar, Mr. Franck Le Roux (Director representing employees) and Mrs. Elena Salgado;
- **Research, Innovation and Sustainable Development Committee**: Mrs. Isabelle Courville (Chairwoman), Mr. Arnaud Caudoux, Mrs. Julia Marton-Lefèvre, Mr. Pavel Páša (Director representing employees), Mrs. Elena Salgado, M Jean Christophe Taret (Director representing employee shareholders) and Mr. Guillaume Texier.
- **Purpose Committee**: Mr. Antoine Frérot (Chairman), Mr. Olivier Andriès, Mrs. Maryse Aulagnon, Mr. Philippe Brassac, Mr. Pierre-André de Chalendar, Mrs. Isabelle Courville, Mr. Franck Le Roux (Director representing employees) and Mr. Guillaume Texier.

The Chief Executive Officer is assisted in the performance of her duties by an Executive Committee, a discussion, consultation and general policy decision-making body which seeks to implement the Group's strategic direction. The Committee is also consulted on major issues concerning the Group's corporate life.

The Executive Committee meets monthly.

As of the date of this document, the Company's Executive Committee included six non-French nationalities and was composed as follows:

- Estelle Brachlianoff, Chief Executive Officer;
- Emmanuelle Menning, Deputy Chief Executive Officer in charge of Finance, and overseeing for Germany BU;
- Laurent Obadia, Deputy Chief Executive Officer in charge of Stakeholders and Communications and overseeing Africa Middle East;
- Geoffroy Carlier, Senior Executive Vice President of Operational Integration and Complex Projects;
- Sébastien Daziano, Senior Executive Vice President of Multifaceted Performance & Strategy;
- Gavin Graveson, CEO Asia-Pacific Zone;
- Philippe Guitard, CEO Central and Eastern Europe Zone;
- Éric Haza, Chief Legal Officer;
- Richard Kirkman, CEO Northern Europe Zone and Chief Growth Officer;
- Anne Le Guennec, CEO Water Technologies Zone;
- Christophe Maquet, Chief Business Performance Officer;
- Gustavo Migues, CEO Iberia and Latin America Zone;
- Jean-François Nogrette, CEO France and Special Waste Europe Zone;
- Helman le Pas de Sécheval, General Counsel and overseeing Italy BU;
- Nadège Petit, CEO North America Zone;
- Isabelle Quainon, Chief Human Resources Officer;

In addition, Management Committee meetings bring together, each quarter all the Group's functions and geographies to share and commit to the Group's challenges and outlook. At the date of this document, this Committee had 36 members, including the 16 Management Committee members; its composition can be viewed on Veolia's website (www.veolia.com).

2

ACCOUNTING AND FINANCIAL INFORMATION

2 Accounting and financial information

2.1 KEY FIGURES

Group key figures are presented in accordance with the definitions as described in the publication of the financial statements for the year ended December 31, 2025 (see Chapter 5.1 – Definitions).

			2026 / 2025		
(€ million)	September 30, 2025	September 30,2026	Δ	Δ at constant exchange rates	Δ at constant scope & exchange rates
Revenue	**32,323**	**33,310**	**3.1%**	**3.3%**	**2.1%**
EBITDA (1)	**5,080**	**5,404**	**6.4%**	**6.5%**	**5.1%**
Current EBIT (2) (3)	**2,737**	**2,950**	**7.8%**	**8.0%**	**6.7%**
Net industrial investments (including new operating financial assets)	-2,621	-2,578			
Net free cash-flow	-205	-200			
Net financial debt - Closing (4)	**-19,925**	**-25,423**			

(1) The indicators are defined in Section 5.1 .
(2) Including the share of current net income of joint ventures and associates.
(3) Re-presented for depreciation of revalued assets, identified during the Suez purchase price allocation, of €125 million as of September 30, 2025 and €120 million as of September 30, 2026, as defined in Section 5.1
(4) Net financial debt excludes the remeasurement of financial liabilities during the Suez purchase price allocation as defined in Section 5.1

The main foreign exchange impacts between September 30, 2026 and September 30, 2025 are as follows:

FX impacts as of September 30, 2026 (vs September 30, 2025)	%	*(€ million)*
Revenue	-0.3%	-87
EBITDA	-0.1%	-7
Current EBIT	-0.2%	-6
Net financial debt (1) (2)	1.1%	-210

(1) Including fair value adjustment
(2) Vs December 31,2025

2.2 GROUP GEOGRAPHIC PERFORMANCE

2.2.1 Revenues by operating segment

Consolidated revenue totaled €33,310 million as of September 30, 2026, compared with €32,323 million as of September 30, 2025. The increase was +2.1% at constant scope and exchange rates and +2.6% excluding the effect of energy prices, which mainly affects Europe.

			2026/2025		
(€ million)	September 30,2025	September 30,2026	Δ	Δ at constant exchange rates	Δ at constant scope and exchange rates
Water technologies	3,555	3,403	-4.3%	-2.4%	-2.5%
Americas, Asia Pacific, Africa Middle-East	8,334	9,067	8.8%	9.7%	4.7%
Europe[1]	13,816	14,253	3.2%	2.8%	2.8%
France and Hazardous Waste Europe	6,616	6,571	-0.7%	-0.7%	-0.2%
Other	2	16	-	-	-
GROUP	**32,323**	**33,310**	**3.1%**	**3.3%**	**2.1%**

The Group's consolidated revenue amounted to €11,117 million in the third quarter of 2026, compared with €10,275 million in the third quarter of 2025. It increased by +4.9% at constant scope and exchange rates and by +5.0% excluding the impact of energy prices.

Var. Revenue in €M vs 2025 at constant scope & exchange rates	H1 2026	Q3 2026	September 2026	
Water technologies	- 4,8% +0.6% excl. projects	+2.3% +6.4% excl. projects	3,403	- 2,5% +2.6% excl. projects
Americas, Asia Pacific, Africa Middle-East	+3.9%	+6,2%	9,067	4.7%
Europe[1]	+1.1% +2.6% excl.energy prices	+ 6.9% +6.9% excl. energy prices	14,253	+ 2.8% +3.8% excl. energy prices
France and Hazardous Waste Europe	-0.8%	+0.9%	6,571	-0.2%
GROUP	**+0.8% +1.5% excl energy prices**	**+ 4.9% +5.0% excl energy prices**	**33,310**	**2.1% + 2.6% excl energy prices**

As of September 30, 2026, revenue by operating segment breaks down as follows:

Revenue as of September 30,2026: €33,310 million

Compared with September 30, 2025, the revenue increase as of September 30, 2026 was +2.1% at constant scope and exchange rates.

- **Water Technologies** business recorded revenue of €3,403 million, down -2.5% at constant scope and exchange rates. After a first half impacted by the geopolitical situation in the Middle East, the business is showing gradual improvement thanks to targeted pricing and business development initiatives. In the third quarter, the order book increased and revenue excluding Projects rose by +6.4% at constant scope and exchange rates, bringing growth to +2.6% at the end of September.
- In **Americas, Asia Pacific, Africa Middle-East**, revenue totaled €9,067 million, representing growth of +4.7% at constant scope and exchange rates, with an acceleration to +6.2% in the third quarter. It increased in all geographies:
  - **In North America,** revenue reached €2,680 million, up +4.8% at constant scope and exchange rates (and up +6.8% in the third quarter), notably driven by price increases in Regulated Water and Hazardous Waste;
  - Revenue in **Latin America** was €1,589 million, an increase of +10.9% at constant scope and exchange rates, and 12.7% in the third quarter. This performance reflects price indexation and contract wins, notably the Water business in Colombia (Cúcuta contract) and in Chile, growth in Waste in Colombia, Brazil and Argentina, as well as strong momentum in Energy Services in Brazil;
  - In **Asia**, revenue amounted to €1,757 million, up 3.1% at constant scope and exchange rates, with growth accelerating in the third quarter (+6.6%). This growth was supported by strong momentum in the Municipal Water business in Japan, with a contract renewal rate of nearly 100%. In China, resilient performance in Energy and organic growth in the Waste business offset the decline in Industrial Water;
  - In the **Pacific region**, revenue amounted to €1,735 million, up 3.4% at constant scope and exchange rates. Activity was driven by the strong performance of waste treatment and recovery activities, with higher volumes at landfill sites and transfer stations, as well as a positive pricing effect;
  - In **Africa Middle-East**, revenue totaled 1,307 million euros, slightly up +1.5% at constant scope and exchange rates, and this despite the effect of the conflict in the Middle-East;
- Revenue in **Europe**[1] reached €14,253 million as of September 30, 2026, increasing by +2.8% at constant scope and exchange rates. Excluding the impact of energy prices, revenue increased +3.8% with an acceleration of 6.9% in the third quarter;

[1] *As a reminder, the IFRS 8 "Europe" segment corresponds historically to the IFRS 8 "Europe excluding France" segment. This new designation became effective upon the December 31st 2025 publication.*

- In **Central and Eastern Europe**, revenue was €7,946 million, up +2.9% at constant scope and exchange rates excluding the impact of energy prices. This performance was mainly driven by favorable weather conditions in the Energy business during the first half of the year, particularly in Poland and the Czech Republic, as well as strong electricity sales volumes. Growth was also supported by solid momentum in the Water business, with volumes up 1.9% as of September 30 and significant price indexation (notably in Romania and the Czech Republic).
- In **Northern Europe,** revenue reached €3,303 million up +5.1% at constant scope and exchange rates, with strong growth of +10.2% in the third quarter. In the United Kingdom, activity increased by +8.2% at constant scope and exchange rates, driven by price increases and business development, particularly in waste treatment activities and industrial services.
- In **Iberia,** revenue stood at €2,299 million, up +5.7% at constant scope and exchange rates. This growth was notably driven by Spain, where the Water business benefited from favorable tariff revisions and a 2.7% increase in billed volumes. Significant contract wins were recorded in the third quarter, particularly in the water sector, including the award of a contract for essential drinking water services with eight municipalities around Barcelona. The Energy business benefited from increased works activity and higher electricity prices.
- **Italy** generated revenue of €705 million, up +2.1% at constant scope and exchange rates, notably thanks to the positive impact of energy prices.

■ Revenue for **France and Hazardous Waste Europe** segment totaled €6,571 million, down slightly by -0.2% at constant scope and exchange rates compared with September 30, 2025 with an increase of +0.9% in the third quarter:

- **Water** revenue of €2,354 million was up +0.9% at constant scope and exchange rates due to an increase in volumes (+3.8%);
- Revenue in **Waste** business was €2,085 million, down -2.6% at constant scope and exchange rates. This decline was notably due to selective commercial activity, while lower volumes and reduced works activity, as well as lower electricity prices, were partly offset by price indexation;
- **Hazardous Waste Europe** activity recorded revenue of €1,800 million, up +1.9% at constant scope and exchange rates, including a 6.2% increase in the third quarter. The business benefited from a strong third quarter despite the summer heatwaves, following a first half marked by severe weather at the beginning of the year and shutdowns at incinerator plants.

2.3 GROUP PERFORMANCE BY BUSINESS LINE

2.3.1 Revenues by business line

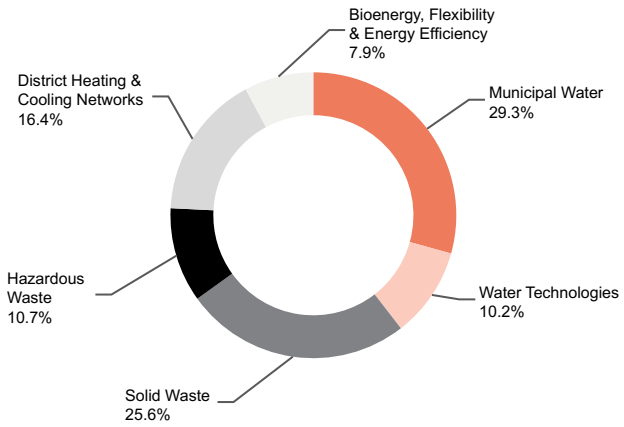

Compared with September 30, 2025, revenue was up +2.1% at constant scope and exchange rates. Excluding energy prices, revenue increased +2.6%. The change in revenue by business is due to the following, at constant scope and exchange rates in relation to 2025:

			2026/2025		
(€ million)	September 30, 2025	September 30,2026	Δ	Δ at constant exchange rates	Δ at constant scope and exchange rates
Municipal Water	9,425	9,762	3.6%	4.4%	4.5%
Water Technologies	3,555	3,403	-4.3%	-2.4%	-2.5%
Water	**12,981**	**13,165**	**1.4%**	**2.5%**	**2.6%**
Solid Waste	8,397	8,512	1.4%	0.9%	1.1%
Hazardous Waste	3,126	3,566	14.1%	14.9%	2.6%
Waste	**11,523**	**12,078**	**4.8%**	**4.7%**	**1.5%**
District Heating & Cooling Networks[1]	5,378	5,453	1.4%	0.5%	0.9%
Bioenergy, Flexibility & Energy Efficiency[1]	2,441	2,615	7.1%	7.3%	5.3%
Energy [1]	**7,820**	**8,067**	**3.2%**	**2.6%**	**2.3%**
GROUP	32,323	33,310	3.1%	3.3%	2.1%

[1] *Restated to reflect changes in the organization and ensure comparability between periods.*

Revenue for the period ended September 30, 2026 breaks down by business as follows:

Revenue as of September 30,2026: €33,310 million

The main changes in revenue by business at constant scope and exchange rates compared with figures for the period ended September 30, 2025 break down as follows:

Water revenue

The **Water** activity recorded an increase of +2.6% at constant scope and exchange rates, mainly driven by tariff increases of +1.6%, as well as improved volumes and commercial gains, partially offset by the deferral of projects in Water Technologies.

Revenue from **Municipal Water** rose by +4.5% at constant scope and exchange rates. This positive momentum was largely driven by solid tariff increases across most geographies (particularly in Spain, Central and Eastern Europe, North America and Chile). This was complemented by an increase in water volumes (notably in France for +3.8% and Spain for +2.7%) with a +5.3% rebound in the third quarter, driven by heatwaves.

Revenue from **Water Technologies** declined by -2.5% at constant scope and exchange rates, but rebounded positively in the third quarter of +2.3% following the implementation of an action plan and supported by a strong order backlog. The business was impacted by a decline in Projects activity, particularly in the Middle East.

Waste revenue

Revenue from the **Waste** business increased (+1.5%) at constant scope and exchange rates as a result of tariff reviews (+3.1%), which offset the impact of the commerce/volumes/works impact (-1.2%) and the negative impact of bad weather in the first quarter of 2026 in Europe and the United States.

Revenue from **Solid Waste** grew by +1.1% at constant scope and exchange rates, driven by growth of 4.3% in the third quarter. This significant rebound was supported by strong commercial momentum and price increases, with solid performances in the United Kingdom, Latin America and Asia. This momentum offset the decline recorded in France and Germany, resulting from a deliberate policy of commercial selectivity in municipal collection activities and lower energy prices.

Revenue from **Hazardous Waste** rose by +2.6% at constant scope and exchange rates. This growth was driven in particular by commercial gains and positive price adjustments in Europe and the United States, offsetting the negative impact of adverse weather conditions in the first quarter of 2026.

Energy revenue

Energy revenue was up +2.3% at constant scope and exchange rates, and +3.8% excluding the impact of energy prices. The favorable climate impact of +1.3% and the commerce/volume effect of +2.8% allowed to largely offset the unfavourable energy price effect of -1.5%.

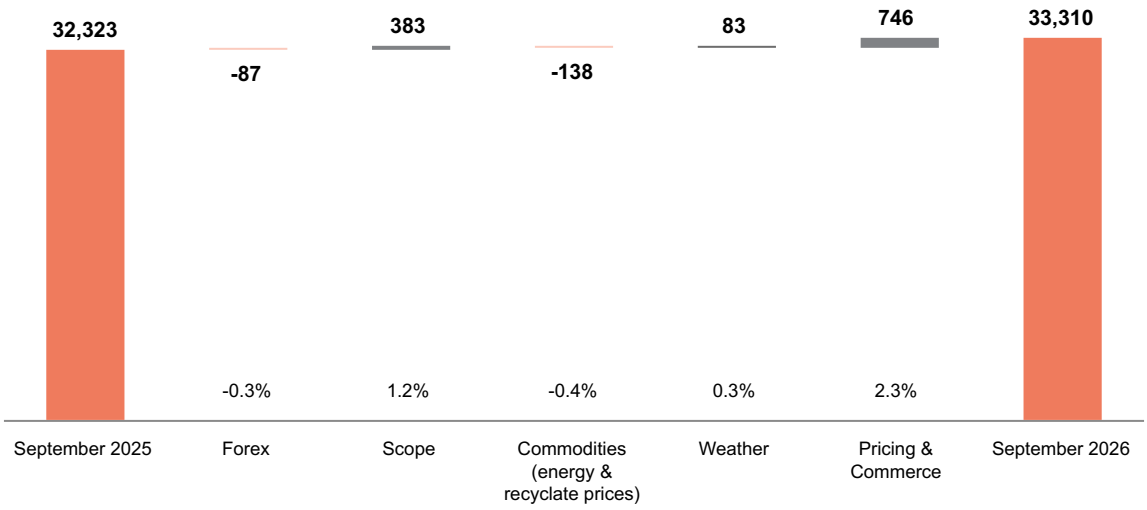

Revenue from **District heating and cooling networks**, mainly located in Central and Eastern Europe, saw growth of +3.3% at constant scope and exchange rates and after neutralizing the impact of energy prices. This growth was driven by a combination of favorable climate conditions and strong volumes despite lower energy prices.

Revenue from **Bioenergy**, **flexibility and energy efficiency** rose by +4.8% at constant scope and exchange rates and excluding the impact of energy prices. This development was mainly due to the solid performance in Iberia and Latin America.

2.4 GROUP PERFORMANCE EVOLUTION BY EFFECT

2.4.1 Analysis of changes in Group revenues

Revenue was up +2.1% at constant scope and exchange rates, and +2.6% excluding energy prices. It breaks down as follows:

The **foreign exchange impact** of -€87 million (-0.3%) reflects the Group's international scope (around 60% of its revenue from non-euro sources) and is owed primarily to the depreciation of the US, Japanese, British, Hong Kong and Argentinian currencies, which was partially offset by the appreciation of the Czech, Hungarian and Australian currencies[1]. It is worth noting that these are conversion impacts, not transaction impacts, and they have no effect on margins.

The **scope effect** of +€383 million (+1.2%) was primarily due to the acquisitions of Clean Earth in the United States and Enviropacific Services in Australia in the Hazardous Waste Treatment sector.

The impact of commodities (corresponding to changes in energy and recyclate prices) amounted to -€138 million (-0.4%), due to lower energy prices (-€147 million), mainly in Central and Eastern Europe (cogeneration), in France and the United Kingdom, in waste recovery, which was not offset by the positive effect of recyclate prices (+€9 million).

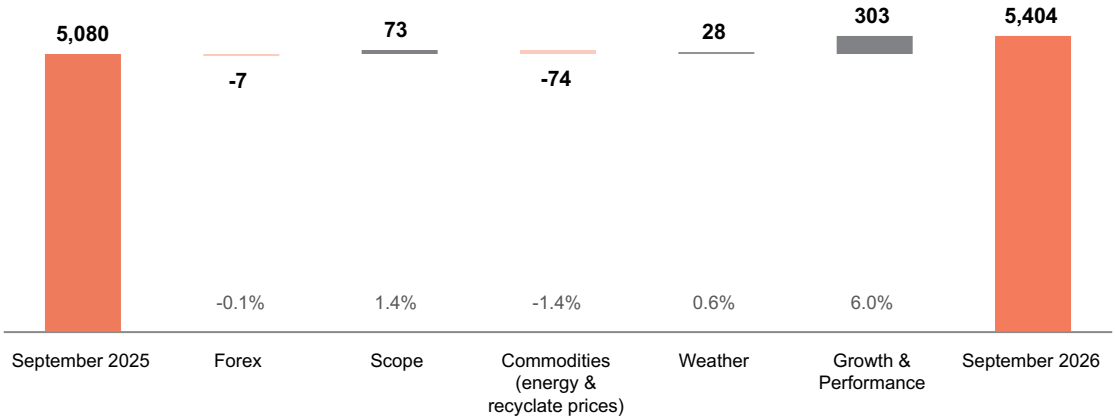

The climate impact was +€83 million (+0.3%), primarily in Energy in Central and Eastern Europe due to a colder winter, particularly in the first quarter of 2026.

Favorable **Pricing & Commerce effects** totaled +€746 million (+2.3%), driven by sustained growth in Water and Energy and favorable tariff reviews in Water and Waste activities, despite decline in Waste volumes.

[1] *Main foreign exchange impacts by currency: the US dollar (-€142 million), the Japanese yen (-€44 million), the pound sterling (-€38 million), the Hong Kong dollar (-€16 million) and the Argentine peso (-€14 million), partially offset by the Czech koruna (+€35 million),the Hungarian forint (+€73 million), the Australian dollar (+€89 million).*

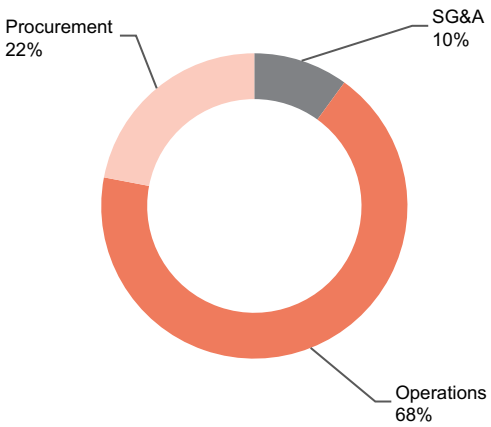

2.4.2 Analysis of changes in Group EBITDA

Compared with September 30, 2025, EBITDA increased by +5.1% on a constant-scope and constant-currency basis. The change in EBITDA between 2025 and 2026 breaks down as follows:

- **Foreign exchange** on EBITDA amounted to -€7 million (-0.1%). It reflects the Group's international scope and is owed primarily to the depreciation of the US, British and Japanese currencies, which was partially offset by the appreciation of the Czech, Hungarian and Australian currencies[1]. It is worth noting that these are conversion impacts, not transaction impacts, and they have no effect on margins;
- The **scope effect** of +€73 million (+1.4%) was primarily due to the acquisitions of Clean Earth in the United States and Enviropacific Services in Australia in the Hazardous Waste Treatment sector;
- The change in **commodity prices** had a net unfavorable impact on EBITDA of -€74 million (-1.4%) linked to the deterioration in energy price, particularly in Central and Eastern Europe (cogeneration), France and the United Kingdom in the Waste business and the temporary margin squeeze resulting from fuel prices;
- **The weather impact** was favorable at +€28 million (+0.6%), mainly in Energy in Central and Eastern Europe in the first semester 2026;
- **Growth and performance** were up +€303 million (+6.0%), thanks to Pricing, Productivity and Efficiency (net of gains shared with customers, contract renegotiations and timing effects on the passing on of costs), the Commerce/Volumes/Works and Water Technologies synergies (30 million euros).

Efficiency plan: €294 M

[1] *Main foreign exchange impacts by currency: the US dollar (-€26 million), the pound sterling (-€6 million) and the Japanese yen (-€4 million), partially offset by the Czech koruna (+€9 million), the Hungarian forint (+€10 million) and the Australian dollar (+€12 million).*

2.5 OTHER INCOME STATEMENT ITEMS

2.5.1 Current EBIT

Group Current EBIT for the period ended September 30, 2026 is €2,950 million, up +6.7%[1)] at constant scope and exchange rates on the year ended September 30, 2025. EBITDA reconciles with Current EBIT as follows:

(€ million)	September 30, 2025	September 30,2026
EBITDA	**5,080**	**5,404**
Renewal expenses	-231	-232
Amortizations [(1)], including repayment of operational financial assets	-2,262	-2,403
Provisions, capital gain or loss on disposals of fixed assets, and others	73	85
Share of current net income of joint ventures and associates	77	96
Current EBIT	**2,737**	**2,950**

The +€184 million (+6.7%) increase in Current EBIT[(1)] at constant scope and exchange rates compared with figures for September 30, 2025 is mainly due to:

- a good EBITDA growth (+€258 million at constant scope and exchange rates);
- an increase in amortization[(1)], including principal payments on operating financial assets (-€97 million at constant scope and exchange rates) and excluding operating financial assets, amortization increased by +2.9% at constant scope and exchange rates;
- an increase in "share of current net income of joint ventures and associates" of +15 million euros at constant scope and exchange rates.

The impact of foreign exchange fluctuations on current EBIT is unfavorable by -€6 million, mainly due to depreciation of the US dollar (-€17 million), the pound sterling (-€3 million), the Japanese yen and the Argentinian peso (-€2 million each), partially offset by positive impacts on the Czech koruna (+€4 million), and the Australian dollar and the Hungarian forint (+€7 million each).

(1) Excluding Suez & Clean Earth PPA.

3

FINANCING

3 Financing

3.1 CHANGE IN FREE CASH FLOW AND NET FINANCIAL DEBT

Net free cash flow before financial investments and dividends was -€200 million as of September 30, 2026, versus -€205 million as of September 30, 2025.

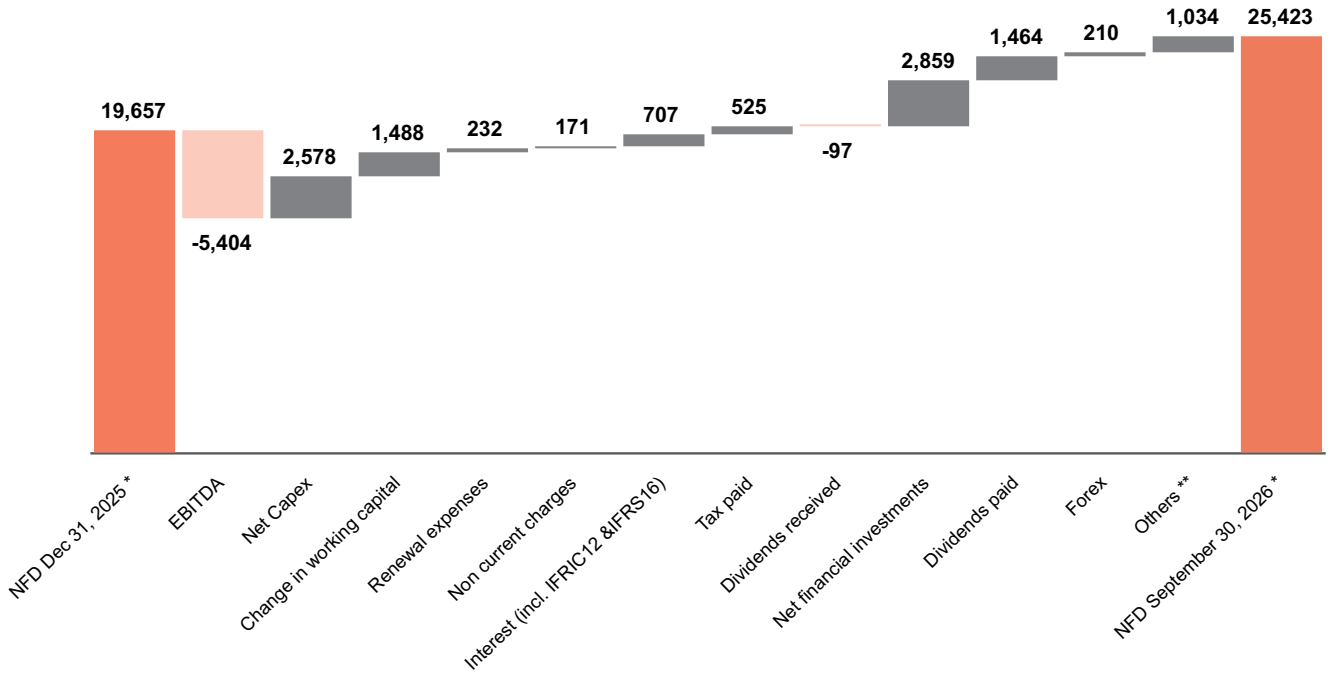

The change in net free cash flow compared with the half year ended September 30, 2025 reflects:

- The increase in EBITDA, by +324 million, driven by the organic growth of activities and the gains generated by the operational and commercial efficiency plans;
- net industrial investments of -€2,578 million, a decrease compared to September 30, 2025 of +€43 million. These include investments in Hazardous Waste Treatment projects for €192 million;
- The change in operating working capital amounted to -€1,488 million, versus -€1,272 million as of September 2025 due in particular to longer collection periods in the Middle East as a result of the geopolitical context, and a decrease in advance payments in the Projects activity.

Net financial debt amounted to €25,423 million as of September 30, 2026, compared with €19,657 million as of December 31, 2025.

Compared with December 31, 2025, the change in net financial debt is mainly due to:

- Net free cash flow of -€200 million ;
- Financial investments net of disposals of -€2,859 million mainly following the acquisition of Clean Earth in the United States for -€2,804 million and Enviropacific Services in Australia for -€137 million and the disposal of Rookery in the United Kingdom for +€101 million (see 1.2.2 Changes in Group structure) ;
- The payment of dividends approved by the Combined General Meeting of 23 April 2026 for an amount of -1,099 million euros.
- Repayment of hybrid debt for -€500 million;
- The share capital increase under the Sequoia 2026 employee share ownership program for a net amount of +€340 million;
- Net financial debt was also impacted by foreign exchange gains and losses and fair value adjustments of -€210 million as of September 30, 2026, mainly as a result of variation in the dollar;
- The concurrent capital reduction through cancellation of -€432 million in treasury shares acquired under the share buy-back program, to neutralize the dilutive effect of the Sequoia offer;

*** Net financial debt excluding the impact of the remeasurement of debt as part of the Suez purchase price allocation, see Section 5.1*

***Including +€500 million of hybrid debt repayment, -€340 million related to the Sequoia operation, +€432 million of concurrent capital reduction through cancellation of treasury shares.*

OTHER ITEMS

4 Other items

4.1 OUTLOOK

OUR 2026 TARGETS ARE CONFIRMED

- Solid organic[1] revenue growth, excluding energy prices;
- Organic[1] EBITDA growth of +5% to +6%;
- Current net Income Group share[2] growth of minimum +8% at constant forex, incl. Clean Earth;
- Current EPS Group share,[2] to grow in line with current net income Group share[2] *(thanks to share buyback plan to compensate the impact of the employee shareholding program)*
- Dividend growth in line with current EPS Group share growth[2];
- Leverage ratio equal or slightly above 3x with Clean Earth.

In addition:

- The Clean Earth acquisition will be accretive to current net income from 2027. Clean Earth PPA will be treated as a non current item
- The €2bn+ disposal program will be delivered by mid 2028.

GreenUp trajectory is fully confirmed.

[1] *At constant scope and exchange rates.*
[2] *Excluding Suez and Clean Earth PPA.*

5

APPENDICES

5 Appendices

5.1 DEFINITIONS

No changes have been made to non-GAAP financial indicators used by the Group in the preparation of the financial statements as of September 30, 2026.

5.1.1 Non-Strictly accounting indicators (non GAAP)

The expression **"change at constant exchange rates"** represents the change resulting from the application of exchange rates of the prior period to the current period, all other things being equal.

EBITDA comprises the sum of all operating income and expenses received and paid (excluding restructuring costs, non-current working capital impairments, renewal expenses and share acquisition and disposal costs) and principal payments on operating financial assets.

The EBITDA margin is defined as the ratio of EBITDA to revenue.

To calculate **current EBIT** (which includes the share of current net income of joint ventures and associates), the following items are deducted from operating income:

- impairment of goodwill of controlled subsidiaries and equity-accounted entities;
- restructuring charges;
- non-current provisions and impairment;
- non-current and/or significant impairment of assets (property, plant and equipment, intangible assets and operating financial assets);
- depreciation of remeasured assets in the context of the Suez (2022) and Clean Earth (2026) purchase price allocation;
- share acquisition costs.

The cost of current net financial debt represents the cost of net financial debt, excluding the amortization of debt remeasured as part of the Suez purchase price allocation.

Net industrial investments, as presented in the statement of changes in net financial debt, include industrial investments (purchases of intangible assets and property, plant and equipment, and new operating financial assets), net of industrial asset divestitures.

The Group categorizes its investments:

- maintenance investments which reflect the replacement of equipment and installations used by the Group;
- growth investments which broadly correspond to investments included within our existing contracts or contractual requirements;
- discretionary growth investments which reflect investments in new equipment and installations linked to new projects, contract wins or significant new developments and extensions to existing projects or contracts.

The last two categories are defined as growth investments.

Net financial investments as presented in the statement of changes in net financial debt include financial investments, net of financial divestitures.

Financial investments include purchases of financial assets, including the net financial debt of companies entering the scope of consolidation, and partial purchases resulting from transactions with shareholders where there is no change in control.

Financial divestitures include disposals of financial assets including the net financial debt of companies leaving the scope of consolidation, and partial divestitures resulting from transactions with shareholders where there is no change in control, as well as issues of share capital by non-controlling interests.

Net free cash flow corresponds to free cash flow from continuing operations, and is equal to the sum of EBITDA, dividends received, changes in operating working capital and operating cash flow from financing activities, less net financial expenses, net industrial investments, taxes paid, renewal expenses, restructuring costs and other non-current expenses.

Net financial debt (NFD) represents gross financial debt (non-current borrowings, current borrowings, bank overdrafts and other cash position items) which includes IFRS 16 lease debt, net of cash and cash equivalents, liquid assets and financing-related assets, including fair value adjustments to derivatives hedging debt. Liquid assets are financial assets composed of funds or securities with an initial maturity of more than three months, easily convertible into cash, and managed with respect to a liquidity objective while maintaining a low capital risk. Net financial debt excludes the net impact of the remeasurement of debt in the context of the Suez purchase price allocation.

The leverage ratio compares financial debt, including IFRS 16 net closing balances, to EBITDA, also including IFRS 16.
